EXPERIENCE

S&P Global   Oct. 2020 – Present (Boulder, CO / Remote)
Software Engineer
Associate II Software Engineer

- As part of a small agile team developed new UI features for a sitewide redesign for a client in the financial industry
- Refactored web components to support multi-tenancy allowing easy onboarding of new regions
- Added support for Google Analytics tracking, allowing clients to track how users are using their site
- Refactored web components to meet accessibility requirements for ADA compliance
- Built Node.js/Express API's to support new web features
- Unit tested all new code written on both on the front and back end with Jest
- Primary technologies: JavaScript, Svelte, Vue, HTML, SCSS, Node, Express, Jest

Izoox, LLC.   Jul. 2019 – Jun. 2020 (Longmont, CO)
Software Developer
Jr. Software Developer

- Single handedly developed the entire UI for a cross platform React-Native mobile app in 3 months (search "Intelligent Office Systems" on the App Store)
- Lead Front-end Developer on a large internal application built in Vue, Apollo, GraphQL and Laravel
- Supported an SEO overhaul and redesign on a site built in Ruby on Rails
- Delivered feature updates and bug fixes on client sites built in various frameworks/languages
- Primary technologies: JavaScript, Vue, React-Native, Laravel, Php, Ruby on Rails, HTML, CSS, TailwindCSS

Medtronic   Aug. 2015 – Jul. 2018 (Boulder, CO / Minneapolis, MN)
Packaging Engineer
Associate Packaging Engineer

- Prior to switching to Software Development I spent 3 years as a Packaging Engineer designing and qualifying medical device packaging. While it didn't involve writing any code, it introduced me to many problem solving processes/concepts that I still keep in mind today.

EDUCATION

Galvanize Inc   Mar. 2019 (Boulder, CO)
Web Development Immersive

University of Wisconsin - Stout   May 2015 (Menomonie, WI)
B.S. in Packaging
